Fact Sheet: Business In One

Background

- A new cloud-based 'one stop shop' digital platform which takes several different business applications, synchronises their data in real-time and feeds information to a central, customisable dashboard.
- Designed to save small business customers time on administration tasks, freeing up more time to run their business.

Alliance

- Developed in conjunction with Maestrano, an innovative Australian start-up technology company, with globally patented technology for integrating cloud applications.
- Maestrano is headquartered in Sydney with offices in the US, UAE (Dubai), Singapore and UK (London).

How it works

- Spending hours on manual data entry is now a thing of the past.
- NAB Business In One seamlessly integrates an ecosystem of third party business apps, including:
 - Xero (accounting software)
 - MYOB (tax and accounting)
 - QuickBooks (book-keeping)
 - SugarCRM (customer relationship management)
 - Eventbrite (tickets and event hosting)
 - Dolibarr (ERP and CRM systems to manage contacts, invoices, orders, products, stocks, agendas and emailing etc)
 - OrangeHRM (human resource management)
 - Magento (digital e-commerce solution for order management, retail commerce)
 - Signmee (digital mailbox for forms and notices)
 - IODM (automating business accounts receivable)
- Data entered in to any application will be up-to-date in all other apps.
- Provides customers with real time reporting from a customisable, central dashboard, without requiring any technical set up.
- Free for NAB customers - customers only pay for the individual apps they choose to use.
- A targeted launch is being pushed out to 200 NAB business customers and registrations of interest can be made at: www.nab.com.au/businessinone
